### ODE Series

## SPEC SHEET

### Features

New range, the ODE Series of enclosures are designed to be used for Plasma and LCD display panels in outdoor environments. These weatherproof enclosures feature impact resistant viewer windows that are specially treated to minimise glare. Permanently fixed to walls or a ceiling post and supplied with keyed locks, theft deterrent values are maximised. Four thermostat controlled fans ensure no heat or condensation build-up. Installation is simple - as little as 30 minutes - and the custom designed gas struts ease access for installation and service. Air intake filters are quick to change.

Choice of Gilkon colours, Deep Satin Silver or Deep Satin Black. Designed and manufactured in Australia.

Manufactured to IP55 standards.

PROKON ODE SERIES			
Model	8ODE-1	8ODE-2	8ODE-3
Screen Size	42"	50"	65"
Unit Weight (Kg)	58Kg	68Kg	96Kg
Note: Please check with your screen supplier for accurate weights when calculating total load demand for display installation.

Applications

**Wall Mount - Standard**

Most popular model. Secured to internal or external walls. Particularly popular in outdoor smoking areas in hotels and clubs.

**Wall Mount - Slim Profile**

Narrow profile enclosure for a more contemporary finish. Ideal where space is at a premium.

**Ceiling Mount**

Enclosure suspended from ceiling with a specially designed column providing protection for display screen. Ideal for busy retail areas.

**Sealing Rear Cover**

Cover fitted to ODE unit where installation is onto an irregular surface such as rough masonry or stone wall.

### ODE Series – Installations

## SPEC SHEET

Gilkon outdoor display enclosures protect the plasma or LCD screen from vandals as well as the elements. The ProKon ODE range will suit most LCD and plasma screens. It is an extremely cost effective option for large image entertainment and information in public areas.

Select a screen of your choice and the ProKon ODE enables that display to be used securely outdoors at a very reasonable cost. A deep satin silver or black finish will compliment the venue. The high impact resistant window comes standard with an “anti glare film” for outdoor use.

Many years of industrial electrical enclosure design and manufacture has been utilised in the ProKon ODE range. Gilkon also supplies heavy duty enclosures required in mining applications. Those same high quality engineering components are standard in the ProKon ODE range.

To reduce installation labour time, Gilkon designers have introduced a simple but effective two piece cabinet. The base frame is lightweight and very easy to wall mount. Cable access and secure anchor points are easily located using the base frame, the display cabinet then slides into place.

Gilkon is continually expanding the ProKon ODE range in response to the growing applications for visual displays.
