

# Lectern Australia

## Lectern Commander

As its name suggests, this is specifically designed for lectern mounting in educational or presentation applications. A full colour touchscreen can be completely customised with intuitive icons, help messages or even the company logo. While the touchscreen buttons can be programmed to suit your particular needs and help you take command of your audience. The Lectern Commander is able to communicate both direct Infra Red and RS232. A complete A/V and room control solution that is high in features, yet low in cost and very simple to install.

### Features:

- **Combines the best features** - *dedicated key control panel & colour touchscreen in a single unit*
- **Fits directly** - *onto unmodified industry-standard lectern*
- **Modular design** - *allows integration of microphone sockets, lectern light for special applications*
- **32 key** - *digital matrix touch overlay*
- **Flexible** - *can function as a stand-alone software, tools and library*
- **Low power consumption** - *allows operation on long low-voltage cables*
