by **GILKON**

For the first time ever, Rental & Staging companies have access to an Australian designed and manufactured, industrial-grade modular video wall system, that is radically simpler to set up and break down.

Introducing the Gilkon Xtnd Modular Video Wall System.

Wilson & Gilkes have been developing innovative AV products for the Australia market for more than 60 years. This experience ensures that the products they develop meet with Australian design, environmental & manufacturing standards. Wilson & Gilkes understand that the best solutions are a product of a clear understanding of the problem and the pragmatic application of a solution. Xtnd is the latest application of this thinking.

The Xtnd Modular Video Wall System and offers a variety of floor, wall and fly configurations, from one easily assembled range. Use the one kit for a variety of configurations, ranging from double screens to 9 screen super walls.

## **Gilkon Xtnd Modular Video Wall System benefits**

- Mix and match components to allow floor, wall and fly/suspended installation
