AirServer® Embedded Screen Mirroring Solution

The ME and M series models combine professional-class display technology with intuitive screen sharing for meeting rooms and huddle spaces. With AirServer®, the LFDs become the universal receiving device for the user's content (from Mac or PC, iPhone, iPad, Android or Chromebook). AirServer® is a complete wireless presentation solution. No need for apps, cables or dongles to connect.

Quicklaunch™ for better Meetings

The fastest and most secure way to launch any meeting regardless of conferencing provider. Quicklaunch™ provides an intuitive user experience for joining any meeting with one touch – supporting all digital platforms, including Zoom, Google Meet and Microsoft Teams. Quicklaunch user interface offers one-click to start meetings, share devices and launch apps.
