## POD-4 PODIUM LECTERNS

The POD-4 range is a statement of unlimited opportunities. From the very first glance, it impresses with its appealing aesthetics and delivers with its ease of integrating technology for an effortless presentation experience.

Thanks to built-in connectivity and electric height adjustment, it offers supreme comfort and functionality. Digital signage and HD screen configurations provide an additional highlight that maximizes audience engagement.

Available in four models with your choice of colours, finish and options, we guarantee there's a solution to suit the most discerning user, venue and branding requirement.

### MAKE YOUR LECTERN UNMISTAKABLY YOURS.

#### Promote your logo

Select from a range of applications for the logo panel, including vinyl print, acrylic print or 3D laser cut.

An LED illumination strip above your logo ensures that it never goes unnoticed. A switch gives you full control to turn this lighting on or off as you please.

#### Select your colour and finish

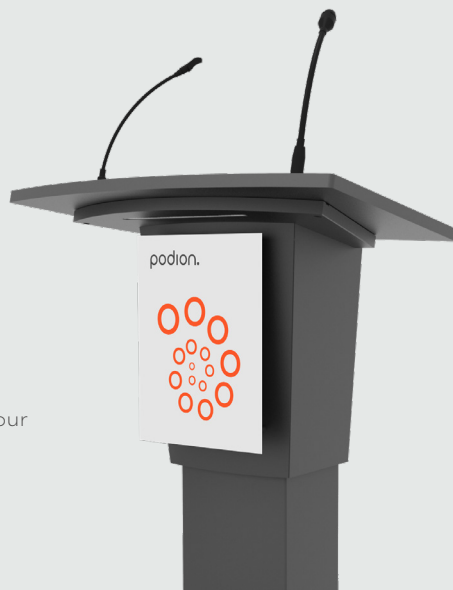

Contact our in-house Design Team to discover how we can match your Podium lectern to your venue and branding. Choose from endless custom colours, paint finishes and timber wrap finishes. Anything is possible.

Need an urgent delivery? Available in black for fast dispatch.

## DISCOVER THE RANGE

### POD-4

Combining style, functionality and durability. Built to withstand constant use, is easy to use and compliments your space.

### POD-4-FS

Engage your audience with digital signage. Display your company logo, slide shows, scrolling text or video playback with ease on the 22" HD monitor.

### POD-4-TS

Boasting all the features of the POD-4 and the additional highlight of a HD monitor embedded below a sheet of anti-glare glass in the work surface.

### POD-4-DS

State of the art podium lectern with electric height adjustment, digital signage and a benchtop monitor for supreme functionality and comfort.

## HIGHLIGHTS

Reading light

Microphone

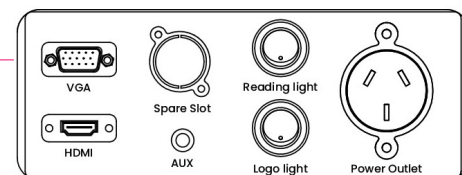

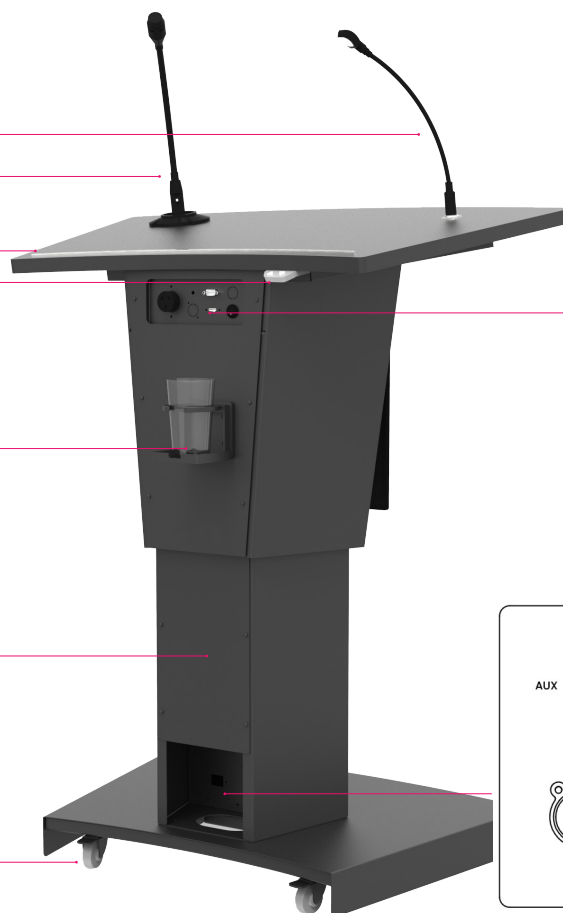

Metal rail support

Height controls

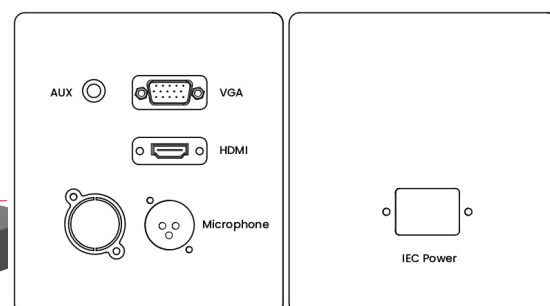

Cup holder

Removable  
column cover

Non-marking, lockable  
castor wheels

Standard Upper input panel for POD-4

Standard Lower input panel for POD-4

### Connectivity

Connector input panels, built-into the the column and base, can be configured to your exact needs.

Just connect your laptop or iPad to to an input panel for instant integration with the venue's projector and sound system.

An Ethernet input provides connection to your local network.

Charging sockets keeps your device fully charged during your presentation.

Smart cable management keeps cables neat and tidy.

### Clear sound and lighting

The optional shock mounted microphone minimizes noise transmission and the flexible gooseneck tube enables ideal placement.

The optional LED reading light illuminates the reading surface so you never have to struggle with insufficient lighting.

### Portability

Non-marking, heavy duty castor wheels facilitates easy portability from one space to another. Apply the brakes for stability when in use.

### Comfort and Control

Adjust height of the lectern simply by the push of a button. The entire work surface adjusts from 785 to 1085mm (31 - 42") to suit primary school children to tall adults.

Place a laptop, tablet and documents onto the generously sized inclined benchtop.

Enjoy the convenience of a cup holder located within easy reach on the column.

Minimum height 785mm (31")

Maximum height 1085mm (42")
