

CHIAYO

The Chiayo Electronics Company was founded in 1971 in Chiayi City, Taiwan. In the beginning, the company's main focus was on the manufacturing of Electronic Condenser Microphones (ECM). Chiayo were the first manufacturer to produce this kind of microphone in Taiwan. A few years later Chiayo recorded another first by introducing the first FM wireless microphone in Taiwan. This was followed by pioneering the wireless microphone systems all the way from VHF, UHF, Infrared and fixed frequency to the more modern PLL-Synthesised technology of today.

After more than 3 decades of development, Chiayo is now recognised worldwide as a leading designer and manufacturer of professional wireless microphones and wireless portable PA's.

With representation in Australia for over 30 years and a national support network, Chiayo is the most trusted and favoured brand of portable PA systems and wireless microphone systems.

MEET THE FAMILY

PROFESSIONAL WIRELESS PA SYSTEMS

Chiayo Wireless Portable PA Systems provide the ultimate solution in portable, wireless sound reinforcement for presentation and performance applications.

Chiayo's all-in-one design includes rechargeable batteries which allows every model in the range to be easily transported and safely used in almost any environment – including outdoors. Providing high-quality voice and music reproduction for audiences ranging from 10 to 200+ people.

Portable Wireless Amplifier System

Built with performers, presenters and instructors in mind, the Stage Man combines a powerful 150 watt power amplifier and an 8" full range speaker in a compact and rugged ABS enclosure.

Available with up to two wireless microphones or belt packs and includes two microphone and instrument inputs as well as Bluetooth® and USB players as standard. The versatile Stage Man is the perfect portable solution for larger audiences.

- 150 Watts
- 8" full-range speaker
- Rechargeable batteries eliminate all cables so you can take it anywhere!
- Built-in Bluetooth®, USB/SD Player and Recorder
- Optional CD/USB Player (replaces Bluetooth® player)
- Switchable Voice Priority automatically drops the music volume when you speak
- Available with up to two receiver modules
- 2x microphone and 2x instrument inputs
- Built-in reverb control for wired and wireless microphones
- 2-band equaliser, bass / treble and master volume control
- Expand your Stage Man PA system with both powered and passive extension speakers as well as an outdoor, horn loaded sports arena package (SPORTSPK)
- Line input for portable devices including phones and tablets – cable included
- Includes DC35 dust cover

See page 17 for accessories

STAGE MAN

Portable PA

Portable Wireless Mixer Amplifier System

With a powerful and efficient 200-watt digital amplifier and an 8" woofer and 1" horn in a 2-way system the versatile Stage Pro is built for the performer.

Available with up to four wireless microphones or belt packs as well as two microphone and instrument inputs.

- 200 Watts
- 8" woofer and tweeter
- Rechargeable batteries eliminate all cables so you can take it anywhere!
- Optional Bluetooth®, USB/SD Player and Recorder
- Optional CD/USB Player
- Switchable Voice Priority automatically drops the music volume when you speak
- 2x microphone and 2x instrument inputs
- Built-in reverb control for wired and wireless microphones
- 2-band equaliser, bass / treble and master volume control

IrDA Series

The Live, Performer and Stage IrDA Series wireless packages all feature patented bi-directional frequency syncing system, which can upload and download to and from the transmitter via infrared sensors.

All systems feature 100, user selectable UHF channels in 3 bands.

- Easy to use LCD Menu driven display
- SCAN function automatically locates the next clean frequency
- Up to 16 non-interfering channels can be operated simultaneously within a selected 25MHz bandwidth. (In 566 and 650MHz bands only)
- XLR patch lead and rack mounting kit are included in each package

Live^{series}100

wireless audio systems

Live-100 system packages feature a diversity metal receiver. IrDA allows frequency information to be sent and received from both receivers and transmitters.

Performer^{series}100

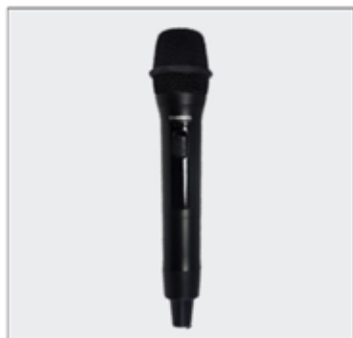

wireless audio systems

PERFORMER-100 system packages include TRUE DIVERSITY metal chassis receiver. IrDA allows frequency information to be sent and received from both receivers and transmitters.

Stage^{series}100

wireless audio systems

STAGE-100 system packages feature "THAT" audio compansion which provides outstanding audio frequency response in a TRUE DIVERSITY metal chassis receiver. IrDA allows frequency information and transmitter battery status indication to be sent and received from both receivers and transmitters.

Wireless Microphone Systems

QR Series — Multichannel Wireless Systems

The QR2000 and QR4000 series are modular rack frames, which can hold up to 2 or 4x receiver modules with IrDA and frequency scan functions respectively.

Both frames have built in antenna dividers and separate balanced audio outputs for each RX module or a single combined balanced output for all four.

QR2000N can also house playback and repeater modules!

QR4000N

QR4000 series full width rack frame that accepts up to 4 modules, antenna divider and antennas included.

FM801	Front mount antenna kit/cable to suit the QR4000F frame
MP90s	Single rack kit to suit QR2000
MP92s	Dual rack kit to suit QR4000

QR2000N

QR2000 series half width rack frame that accepts up to 2 modules, antenna divider and antennas included.

Multimedia Mixer Amplifier

MMA-3000

The MMA-3000 Multimedia Mixer Amplifier is the perfect fit for small installations including cafés, retail stores, fitness studios and waiting rooms.

The single RU unit features a 2.1 Channel, 200W Class D amplifier as well as a single module slot to add either a UHF wireless receiver, Bluetooth® or USB/SD players.

- Bass, treble and balance controls.
- 1x MIC input with voice priority (switchable)
- 2x AUX inputs, (RCA)
- Line input (6.3mm)
- AUX out
- ALD out for assistive listening devices, 3.5mm
- USB Port for charging portable devices
- SUB out with variable crossover

CHIAYO Wireless XLRange Microphone System

**Maximum Range!
Up to 90,000m²**

The XLRange Microphone System is a dual channel distributed receiver system that covers up to 90,000m². Featuring remote frequency and power control via the Remote Control Centre (RCC-2000). Maximum CAT-5e cable length to each receiver is 250m and only one 24VDC switching power adapter powers the entire system! You only need to add cables and connection via CAT-5e to each unit.

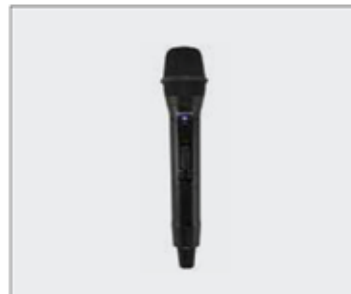

The remote control centre (RCC-2000) manages all power functions, frequency and receiver selection, audio delay and latency.

Single Channel UHF System for up to 45,000m²	
WXLR-S2	Extra long range wireless microphone system package. Consists of 1x Remote control Centre, 2x Remote Receiver Units in single channel operation and 1x SQ6100 handheld wireless mic

GM-143 Conference System

The most unique feature of the GM-143 series is its loop circuit design where any microphone unit can be positioned freely. Up to 60 units can be installed in a conference. The system uses universal Cat 5 / Cat 6 cables for audio connection, one power supply and audio converter will power all units installed on the loop.

Chairman units GM-143C to have the ability to mute the other units in the system (GM-143S).

All gooseneck bases feature telescopic boom arms to ensure the base doesn't need to be moved closer to the speaker.
